

FLIGHT RECORDER SECOND UI/UX TESTS

Interviewed 3 pilots.

Pilot 2 (P2) tested the app with Sony Xperia phone.

What would be good colour for the app?

P1: In my mind, I think it is. It looks like clear.

P2: The main Color is ok, actually, no matter what the color is.

P3: I would prefer yellow color instead of the current one.

Do you think it is necessary to do a separate color schema for daylight use?

P1, P2, P3: No.

P3: Only the contrast (lightness) should be adjusted easily – it is important during flight at night.

What do you think the app structure/buttons/alignments etc?

P1-P3: It looks like easy to use.

Is the app easy to use?

P1, P3: It seems to be very easy to use.

P2: It is easy to use.

What could be done better?

P2: Formats to meet the actual flight equipment formats (altitude, locations, speed). BLOCK/AIR time as displayed in SECONDS are not necessary.

P1: coordinate format is usually different than in the image.

Any improvement ideas?

P1-P3: Nothing more to say.

Do you think you could use this app in the future?

P1-P3: Definitely YES.
