# FIRST FLIGHT RECORDER UX/UI TESTS/INTERVIEW

First Sketch:

Interview with 2 pilots.

Answers marked with P1 / P2

Interviews made online.

Would this kind of app be useful for you?

P1 & P2: Definitely yes.

What do you think about the UI shown?

P1: I understand that this is the First Sketch of the App, but colours are not so intriguing. Functionality / ease to use seems to be OK and clear.

P2: This kind of structure is clear to use.

Do you think that UI is easy to use?

P1: It is easy to use.

P2: Looks like easy to use.

Any improvements?

P1: I would consider different order of the operation buttons - due to my way to log the flight data items (times).

P2: Not at this point.

Anything else to be taken into account?

P1 & P2: Nothing to say.
